

A new requirement is introduced with following specifications –

1. All land and sea vehicles have VIN Numbers.
2. All sea vehicles have Nautical Registration Numbers.

```
<Fleet>
  <NickName>City of San Diego Vehicle Fleet</NickName>
  <Vehicles>
    <Bus>
      <VinNumber>75644444335434516</VinNumber>
      <Year>1991 </Year>
      <Make>Ford</Make>
      <Model>Econline </Model>
    </Bus>
    <Truck>
      <VinNumber>23124124654433511</VinNumber>
      <Year>2004 </Year>
      <Make>Toyota</Make>
      <Model>Tundra</Model>
    </Truck>
    <Motorcycle>
      <VinNumber>52543463463234534</VinNumber>
      <Year>2008 </Year>
      <Make>Kawasaki</Make>
      <Model>Ninja</Model>
    </Motorcycle>
    <Boat>
      <VinNumber>52543463463234534</VinNumber>
      <NauticalRegistrationNumber>123-124XJHDGSGD</NauticalRegistrationNumber>
      <Year>2012 </Year>
      <Make>SeaForce</Make>
      <Model>UltraHi</Model>
      <Type>Motor</Type>
    </Boat>
    <Boat>
      <VinNumber>52543488463234534</VinNumber>
      <NauticalRegistrationNumber>999-124XJHDGSGD</NauticalRegistrationNumber>
      <Year>2000 </Year>
      <Make>WindForce</Make>
      <Model>UltraHi</Model>
      <Type>Sail</Type>
    </Boat>
  </Vehicles>
</Fleet>
```

Before fleet data can be successfully imported into the new application data store, all validation criteria must pass.

Validation Criteria:

1. All Year/Make/Model combinations must be valid.
2. All VIN Numbers must have a valid format.
3. All Nautical Registration Numbers must have a valid format.

Modify existing design to accommodate above stated system requirements.
